

## Texas Track and Concorso, Cresson, TX, October 1, 2006

We joined up with exotic car enthusiasts in this event. The event sponsor, Lamborghini of Dallas (now part of the Boardwalk Auto Group), invited our club to join them. The Concorso was held at the Texas Motorsport Ranch in Cresson, TX. The track is challenging but safe. It is free of obstructions and is designed specifically for sport and high-speed driving. Our members took advantage of several driving options offered, showed their cars and/or observed the festivities. All of our participants and their guests enjoyed a free barbecue lunch courtesy of Lamborghini of Dallas.

We always encourage our members to participate in track events not for competitive reasons, but for us to be familiar with the capabilities of our cars and to enhance our driving skills. This experience will benefit the driver in day-to-day situations and how they react while driving normally on the road. Learning new driving skills in a safe environment and having fun doing so are our club's motivation for organizing or participating in track events. Driving options included all-day driving participation, an afternoon option for those who cannot spend the entire day at the track, and parade laps where all cars, including young passengers, can get on the track. The driving options were set for novice, intermediate or advanced drivers based on experience, and included classroom instruction. Novice drivers had instructors riding with them to show them how to properly handle their own car on the track. More advanced drivers could request an instructor to ride with them if they wished. Some of our members, accompanied by their instructors, took their cars to the very edge of their performance envelope. The driving sessions were paced to the comfort level of each individual driver. We took to the track accompanied by a variety of cars of many makes and models, from the latest ultra high performance Lamborghinis and Ferraris to Corvettes, Vipers, Mazdas, Hondas, Nissans, Fords, Pontiacs, Lotus and BMWs. All types of cars from sedans to roadsters took to the track.

It was an enjoyable experience with safety being the top priority. We thank Lamborghini of Dallas for inviting our club to participate in their event.
